Post-Surgical Instructions

If your cat had surgery today, feed half of a normal meal and a small amount of water once home. Feed as usual thereafter.

Please check your cat's incision daily and contact us if you notice any changes to the incision area or in your cat's behaviour.

Your cat has been given pain medication which should be effective until the day after release from hospital. Please consult us or the emergency clinic before giving any further medication.

Please contact us at (905)331-1500 if you have any questions or concerns.
